

# Strawberry Glaze

This has taste - you will never go back to the store bought jar. I have also used peach jello and peaches.

3 tablespoons of strawberry jello powder (half of a 3 oz box)

1 cup sugar

3 tablespoons cornstarch

1 cup boiling water

Mix dry ingredients in pan. Add boiling water and cook til thick. Cool to room temperature. Spoon small amount of glaze in baked shell. Place berries in (whole or sliced). Cover with remaining glaze. Chill 2 hours.
